Data for School Districts 18

Data for Counties, Development Regions, and the State 40

Data for ECSU Regions 44

Data for Enrollment Size Groups 46

Summary Statistics 48

This is the thirteenth in a series of annual reports, published by the Minnesota Department of Education intended to provide selected enrollment, staffing and financial data for each Minnesota school district. The data items have not changed since 1980-81 and are generally comparable to those presented in prior years. It is thus possible to make many meaningful inter-year comparisons.

Unique this year is the process used to produce Profiles. We have modified the layout somewhat to allow the use of a simplified printing process and to fulfill an earlier publication date than in other years. In addition, five districts (Prinsburg, Franconia, Pine Point, Winsted and Nett Lake) which were treated separately in prior Profiles are now included with the other districts. This change reflects the ever-increasing diversity of school district organizational patterns; these five districts were less unique each succeeding year.

Evaluation of Contents

Content-wise, this edition of Profiles is essentially like that of other recent editions. The first nine pages describe the report and provide a commentary and analysis of some of the more interesting trends. Definitions of the 38 statistical items are contained on pages 10 through 14. Pages 15 through 17 contain an alphabetical list of all school districts, their identification number, and development region. Also included is a state map showing development regions and their constituent counties.

The statistical pages begin on page 18. Pages 18 through 39 contain statistics for individual school districts, pages 40 through 45 for counties and development regions, pages 44 and 45 for ECSU regions, and pages 46 and 47 for districts aggregated into size categories. Pages 48 and 49 contain percentiles and high and low values for each of the 38 statistics.

Notes on Financial Data

The expenditure and revenue data reported in Profiles is derived from UFARS (Uniform Financial Accounting and Reporting Standards), a system utilized by all Minnesota school districts. This data is directly comparable to that reported in the previous three editions of Profiles and is described briefly in Table 1.

Interdistrict Cooperation

Legislation was enacted in 1979 and 1983 to encourage inter-district cooperation in offering services to

pupils. Prior to 1979 every school district was required to offer a full complement of courses for each grade. The new legislation allows districts to cooperate in offering programs. For example, two districts might now "split" grades - one providing all courses for specific grades and the other doing likewise for the remaining grades.

Districts participating in one of these agreements are noted in the report by either an ICA (Inter-district cooperative agreement) or ASE (Agreement for Secondary Education) in parentheses after the district name: In 1984-85 these districts were:

#893 Echo
#896 Wood Lake

#209 Kensington
#265 Hoffman

#409 Tyler
#418 Russell

#655 Sacred Heart
#654 Renville

#328 Sioux Valley
#516 Round Lake

#670 Luverne
#669 Magnolia

#637 Redwood Falls
#652 Morton

#413 Marshall
#415 Lynd

#524 Halstad
#525 Hendrum

#341 Atwater
#464 Grove City

#880 Howard Lake
#427 Winsted

57 Beardsley
#801 Browns Valley

#650 Franklin
#636 Morgan

Caution should be exercised when comparing data, especially financial data, of the cooperating districts with that from districts not involved in such agreements; inter-district financial transfers, in the UFARS system, do not effectively relate costs to pupils served in many of these situations.

In addition to these cooperating districts, the report tables also contain statistics for five other unique districts which were reported in a separate table in previous editions of Profiles. These include two elementary- only districts (Nett Lake #707 and Winsted #427), two districts who send all of their pupils to other districts (Franconia #323 and Prinsburg #815), and an experimental district (Pine Point #025).

For More Information

Additional copies of School District Profiles, 1984-85 may be purchased from the Minnesota State Documents Center at 117 University Avenue, St. Paul, Minnesota 55155 (telephone 612/297-3000); or toll free in outstate Minnesota 1-800-652-9747.

TABLE 1

Sources of Expenditure Data for School District Profiles

This table is intended primarily for persons who are familiar with UFARS, and who wish to examine or verify the expenditure data for a specific school district.

Each of the 16 expenditure categories in Profiles includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below.

The lower section of the table summarizes the funds, major program categories, and object categories used for profiles.

For a further explanation of UFARS, and for definitions of specific funds, programs, and objects, see: Minnesota Department of Education, Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools.

Categories Used in the Report	Funds[1]	Programs[2]	Objects[3]
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199	
20. Regular instruction	1 and 9	200-299	
21. Vocational instruction	1 and 9	300-399	
22. Exceptional instruction	1 and 9	400-499	All objects
23. Instructional support services	1 and 9	600-699	except 500-599
24. Pupil support services	1 and 9	700-799	and 910
25. Operations and maintenance	1 and 9	800-899	
26. Food service	2	All	
27. Pupil transportation	3	All	
28. Other operating programs	1 and 9	0, 500-599, and 900-999	
29. Total PK-12 operating expenditures (this is the total of categories 18 through 28)	1,2,3, & 9	All	
30. Community service	4	All	
31. Capital outlay	5	All	All but 910 and 460[4]
	1,2,3, & 4	All	500-599
32. Building construction	6	All	All but 910
33. Debt service	7	All	All but 910

[1]Funds

1. General
2. Food Service
3. Pupil Transportation
4. Community Service
5. Capital Expenditure
6. Building Construction
7. Debt Service
9. Trust and Agency

[2]Major Program Categories

0	Districtwide (no specific program)
1-99	District and school administration
100-199	District support services
200-299	Regular instruction
300-399	Vocational instruction
400-499	Exceptional instruction
600-699	Instructional support services
700-799	Pupil support services
800-899	Sites, buildings, and equipment
900-999	Other programs

[3]Objects

500-599	Capital expenditures
910	Transfers to other funds

[4] 460, textbook expenditures have been allocated into categories 18-28 to assure valid inter-district and inter-year comparisons.

TRENDS & PATTERNS

This section examines a number of the more interesting facts contained in the statistical tables beginning on page 18. Included are variations between districts as well as year-to-year changes in total state values.

Number of Students

The enrollment decline of the '70s and '80s continues, albeit at a significantly diminished rate. ADM declined to 695,823* or 0.6 percent below the 1983-84 level. This compares with declines of approximately 3.0 percent a year during the late '70s and early '80s and anticipates the modest rise in enrollments projected to begin in the next two or three years. As with all turnarounds resulting from a change in births, it occurs first in the elementary grades; secondary enrollments are still declining significantly.

The ADM of Minnesota's individual PK-12 school districts varies from a low of 87 in Verdi to a high of 37,607 in Minneapolis. Table 2 illustrates this statewide variation in another manner - by aggregating Minnesota's districts into size categories. One can observe that the largest ten percent of the districts enroll 53.8 percent of the pupils while the smallest ten percent enroll only 1.1 percent of the state's pupils. These very discrepancies provide most of the impetus for the interdistrict cooperative efforts described earlier in this report.

Professional Staff

Table 3 shows the number of Minnesota professional staff, as well as pupil-staff ratios, for the past eight years. The trend has generally been downward (i.e., fewer pupils per staff member) for most of that period. The notable exceptions was during the budget crisis

Table 2

1984-85 Resident Average Daily Membership (ADM) for Ten Enrollment Size Groups

Group Number	Size Range (1984-85 Resident ADM)	Number of Districts	Total Resident ADM	Percent of State Total
1.	0 to 225 students	44	7,354	1.1%
2.	226 to 290 students	44	11,000	1.6
3.	291 to 394 students	45	14,982	2.2
4.	395 to 474 students	44	19,555	2.8
5.	475 to 644 students	42	23,173	3.3
6.	645 to 844 students	43	30,543	4.4
7.	845 to 1129 students	45	44,168	6.3
8.	1130 to 1799 students	45	63,265	9.1
9.	1800 to 3699 students	42	107,282	15.4
10.	3700 or more students	43	374,501	53.8
	State Totals	**437**	**695,823**	**100.0%**

* Includes ADM for Prinsburg, Franconia, Nett Lake, Winsted and Pine Point which were not included in the regular tables in prior years. These districts account for less than .1 percent of the total ADM.

school year 1982-83 when large cuts were made in school district staff. The continual decline in enrollments explains most of the annual pupil-staff declines. However, the most recent decline in the pupil-staff ratio is almost wholly the result of increases in elementary and special education staff; enrollment declined less than 1.0 percent.

Tax Rates

Figure 1 indicates that average school property tax rates have been increasing during the past four years after many years of declines. The increases are the result of two factors, 1) changes in state funding formulas which allow districts some latitude in raising rates, and 2) an increased number of school districts whose taxpayers approved additional tax levies.

Sources of Revenue

For school year 1984-85 Minnesota school districts as a whole received 46 percent of their revenues from local sources; 50 percent from the state and 4 percent from the Federal government. Figure 2 indicates the nature of this tripartite relationship for selected years since 1975-76. With the exception of the budget crisis year 1982-83, the state contribution has been predominant.

Operating Expenditures

Total PK-12 operating expenditures per pupil unit increased $219 or 8.5 percent between 1983-84 and 1984-85. In the three year period from 1981-82 through 1984-85, operating expenditures increased more than 23 percent. Although the distribution of these expenditures into their constituent parts varies little over time, as shown in Table 4, instruction increased from 58.6 percent in 1980-81 to 61.4 percent in 1984-85. The continued very rapid growth in expenditures for exceptional instruction is part of the reason for this increase.

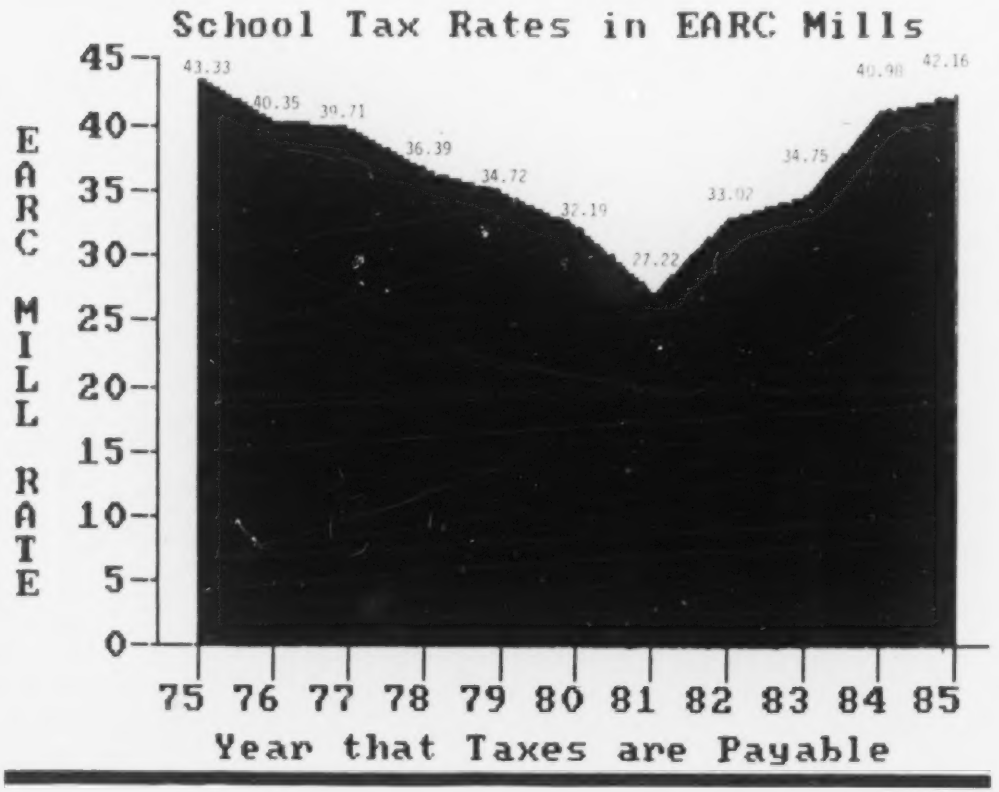
Table 3

State Totals of Professional Staff and Pupil-Staff Ratios 1976-77 through 1984-85

School Year	Total Professional Staff	Pupil-Staff Ratio
1976-77	50,898	16.9
1977-78	49,995	16.7
1978-79	49,723	16.2
1979-80	49,391	15.7
1980-81	49,444	15.2
1981-82	48,236	15.1
1982-83	44,553	16.0
1983-84	44,044	15.9
1984-85*	44,744	15.5

* includes data for five small districts not included in prior year totals

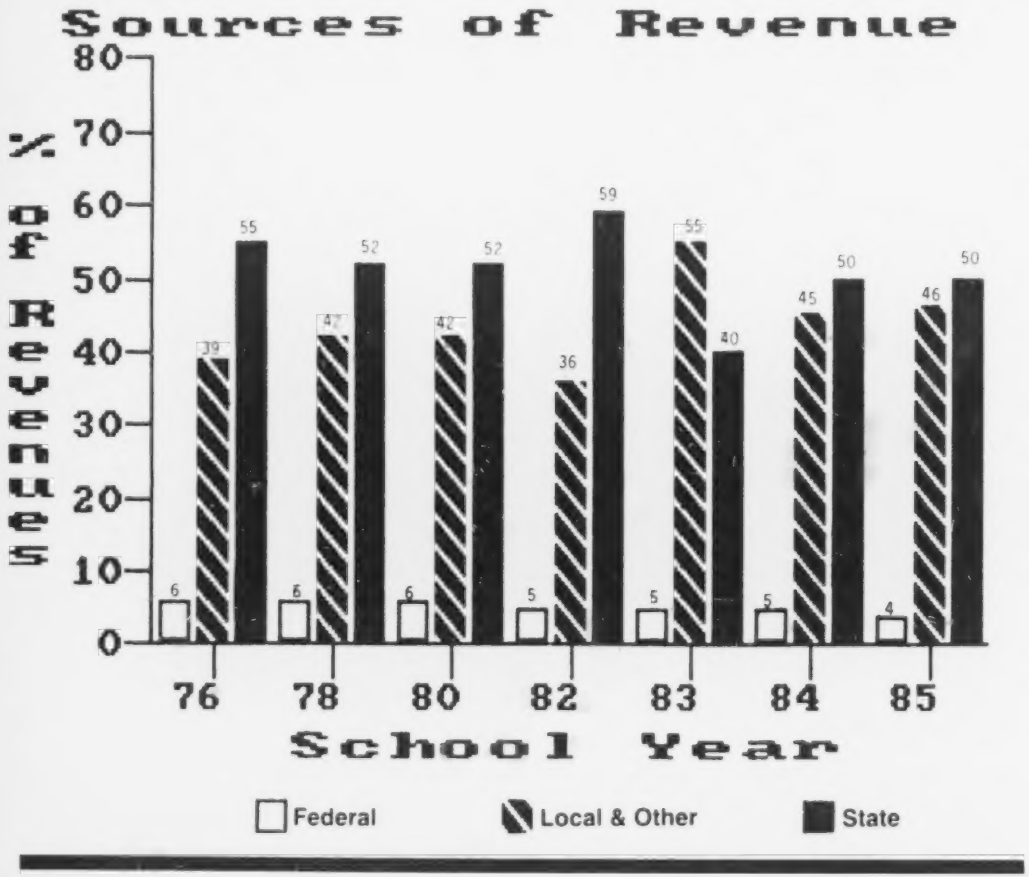
Figure 1



Nonoperating Expenditures

The expenditure items represented by columns 31, 32, and 33 (Capital Outlay, Building Construction, and Debt Service, respectively) constitute non-operating expenditures. Accountants refer to these items as fixed costs - costs which are substantially unchanging irrespective of changes in output (in this case enrollments). Figure 3 shows how little these expenditures have grown since 1976-77. Some observers of elementary-secondary education, nationally, are concerned at what they see as an ongoing crisis in the condition of much of the nation's school buildings and equipment. It is probable that at least some capital maintenance is deferred during recessions and other periods of budgetary constraint.

Figure 2



Community Service

Community services are provided by approximately three-quarters of Minnesota school districts but are little publicized. Services offered range from basic and remedial education to recreational courses in sports and hobbies. The state provides additional aid to districts who levy property taxes for these purposes. Table 5 indicates that community education expenditures have better than doubled since the 1976-77 school year. This growth, in part, reflects a heightened awareness on the part of both legislators and school districts of the advantages of these educational services.

Table 4

State Averages of PK-12 Operating Expenditures per Pupil Unit, 1983-84 and 1984-85

Category	1983-84 Expenditures	1983-84 % of Total	1984-85 Expenditures	1984-85 % of Total
18. District and school administration	$ 153	5.9	$ 172	6.1
19. District support services	66	2.6	70	2.5
Subtotal, Administration	$ 219	8.5	$ 242	8.6
20. Regular instruction	$1159	44.8	$1254	44.7
21. Vocational instruction	63	2.4	67	2.4
22. Exceptional instruction	272	10.5	306	10.9
23. Instructional support services	82	3.2	97	3.4
Subtotal, Instruction	$1576	60.9	$1724	61.4
24. Pupil support services	$ 62	2.4	$ 71	2.5
26. Food service	129	5.0	139	5.0
27. Pupil transportation	183	7.1	194	6.9
Subtotal, Other student services	$ 374	14.5	$ 404	14.4
25. Operations and maintenance	$ 273	10.5	$ 284	10.1
28. Other operating programs	$ 146	5.6	$ 154	5.5
Total PK-12 operating expenditures	**$2589**	**100.0**	**$2808**	**100.0**

Figure 3

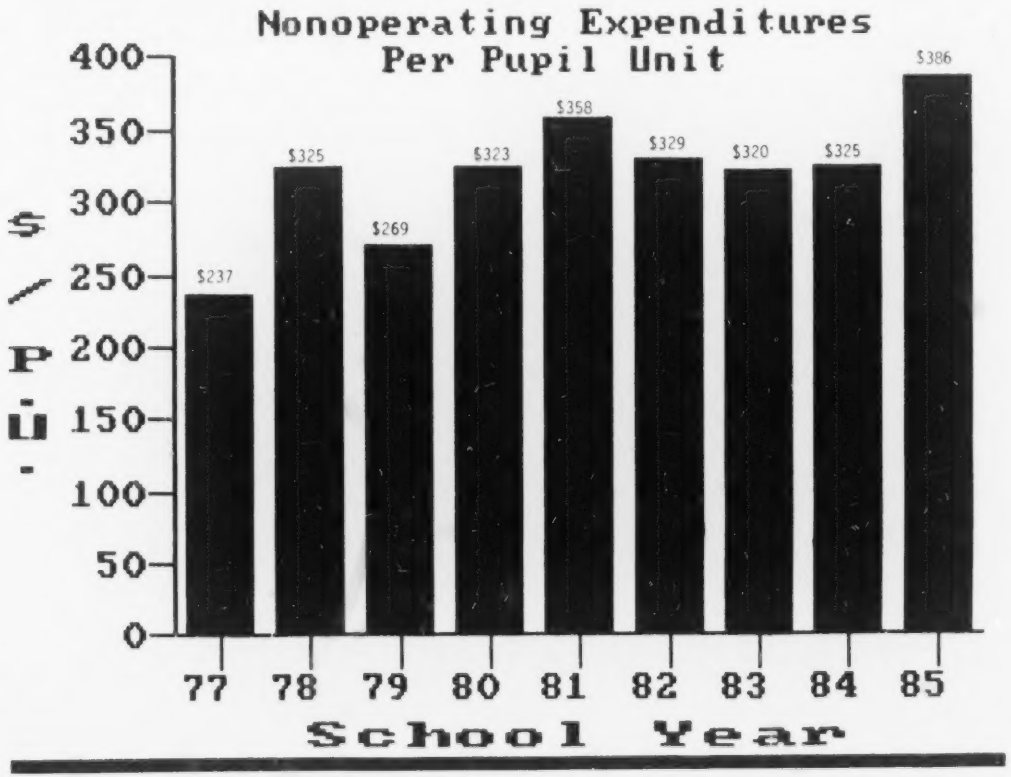


Table 5

Community Service Expenditures Per Pupil Unit	
1976-77	$31.00
1977-78	29.00
1978-79	35.00
1979-80	40.00
1980-81	40.00
1981-82	46.00
1982-83	51.00
1983-84	58.00
1984-85	67.00

Property Valuation

The very substantial differences in property wealth of various school districts have provided the rationale for educational finance reforms from the '60s to the present day. These differences are very evident in Minnesota. Red Lake school district has less than $170 of taxable property per pupil unit while Kennedy has nearly $100,000.

DEFINITIONS

The tables on pages 18 through 45 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1984-85 school year.[1]

1984-85 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be in attendance to be counted in ADM, but they must be in membership (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of total resident ADM. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy levies. Resident membership includes:

1. **Prekindergarten Handicapped** -- ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten** -- ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1-6** -- ADM of students enrolled in grades 1-6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7-12** -- ADM of students enrolled in grades 7-12, including students in secondary-level ungraded and special education classes.
5. **Total** -- Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority** -- The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
7. **Percent Attendance** -- The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported** -- The number of public school students transported to and from school twenty or more days, as a percentage of the district's total enrollment.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary personnel are excluded.

9. **Total Staff FTE** -- The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio** -- The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Rates

These figures show the tax rates, expressed in mills, for school district property taxes payable in 1985. Taxes payable in 1985 provide revenue for the 1985-86 school year.

11. **Auditor Mills** -- The actual school district tax rate, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value.

Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may not be meaningful.

12. **EARC Mills**[3] -- This tax rate is computed by multiplying the district's auditor tax rate times the 1984 market sales ratio. The market sales ratio is the ratio of the market value as determined by local assessors, to the actual selling price of the property. Market sales ratios are compiled by the Minnesota Department of Revenue EARC Sales Ratio Unit.

    EARC tax rates are computed to compensate for differences in assessment practices. Thus, when comparing the level of gross tax burden in various districts, these rates provide a better comparison than auditor tax rates.

Pupil Units (Weighted ADM)

13. **Resident Pupil Units** -- This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.
14. **Total Pupil Units** -- This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district[4], and 2) nonpublic school students who attend the public school part-time for specific classes or services.

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1984-85 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal** -- The percentage of revenues from the federal government, whether paid directly or through another governmental unit.
16. **State** -- The percentage of revenues from the Minnesota State government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.
17. **Local and Other** -- The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources except for federal and state government.

1984-85 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1984-85 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

18. **District and School Administration** -- Expenditures for the school board and for the office of the superintendent, principals, and any other line administrators who supervise staff.
19. **District Support Services** -- Expenditures for central office administration which are not directly related to instruction, pupil support (see #24), or community services (see #30).

Examples include expenditures for business services, data processing, legal services, personnel office, printing, and the school census.

20. **Regular Instruction** -- Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction** -- Expenditures in secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction** -- Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Examples include expenditures for special instruction of students who are emotionally or psychologically handicapped, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.
23. **Instructional Support Services** -- Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audiovisual support, staff development, and computer assisted instruction.
24. **Pupil Support Services** -- Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
25. **Operations and Maintenance** -- Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
26. **Food Service** -- Expenditures for the preparation and serving of meals and snacks to students.
27. **Pupil Transportation** -- Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.
28. **Other Operating Programs**[5] -- Includes all operating expenditures that were not charged to any other category (columns 18-27).
29. **Total PK-12 Operating Expenditures** -- The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1984-85 school year, except capital and debt service expenditures.
30. **Community Service** -- Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
31. **Capital Outlay** -- All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.

32. **Building Construction** -- Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of equipping new buildings, and all other related costs.
33. **Debt Service** -- Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and state loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance** -- This figure is a measure of the district's financial condition at the end of the 1984-85 school year, and of how much resources are available to be used in future years. It is equal to the sum of the unappropriated balances on June 30, 1985, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt, plus the appropriated fund balance for current use of taconite payments; this balance is then divided by 1984-85 resident pupil units (column 13).
35. **Change in Funds Balance** -- The difference between the district's operating funds balance on June 30, 1985 (see #34 above) and on June 30, 1984, divided by 1984-85 resident pupil units. This is essentially equal to the difference between the district's 1984-85 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.
36. **State and Local Operating Costs** -- This figure, also called adjusted maintenance cost, is often used to compare overall costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. It is computed as follows:

    Sum of all expenditures for current operation of the schools
        (doesn't include expenditures for transportation, community services, capital outlay, building construction, or debt service),
    Minus all revenue from the federal government,
    Minus revenue from sale of food and materials,
    Minus admission fees and gate receipts from school activities; This total is then divided by 1984-85 total pupil units (column 14).

37. **Long Term Debt** -- The amount of long term debt outstanding on June 30, 1985, divided by 1984-85 resident pupil units. Long term debt includes general obligation bonds and capital and debt service loans from the state.
38. **1984 EARC Value** -- The 1984 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1984-85 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

Footnotes

1. There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1985; these taxes will provide revenue for the 1985-86 school year. The EARC value (column 38) is based on property values in 1984; this figure will be used in computing state aids and tax levy limitations for the 1986-87 school year.
2. For some school districts and some categories of students, the counts of students transported were estimated for column 8.
3. For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district.

4. In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1984-85 there were 9,750 students (5,300 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be inaccurate in the other district.
5. Some school districts included all expenditures for employee benefits in the same UFARS programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

MINNESOTA SCHOOL DISTRICTS

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order.

	Revenue %			1984 - 85 Expenditures per Pupil Unit																Other Measures per Pupil Unit

boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 14), with the following exceptions: ECSU region 1 contains development regions 1 and 2. ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.

DATA FOR ENROLLMENT SIZE GROUPS

The table below list totals or averages for all districts in each of ten enrollment size groups, based on 1984-85 resident average daily membership (ADM). For example, group 1 includes all districts with 225 or fewer ADM, and group 2 includes all districts with 226 to 290 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

Group No.	Resident ADM)	1984-85 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)

The chief purpose of this table is to permit easy comparisons of districts with similar enrollment. For example, a superintendent in a district with 600 pupils may want to examine the data for group 5 (475 to 644 ADM), to see how his/her expenditures compare with other districts that are of similar size.

SUMMARY STATISTICS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 86.5 to a high of 98.2. Ninety percent of the school districts are within the narrow range of 94.2 (5th percentile) to 97.0 (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate this use of the data.

1. A district which has total K-12 operating expenditures (column 29) of $2,700 per pupil unit is very near the median value, which is $2,732. Thus, about half the districts in the state have lower and half have higher expenditures.

2. A district with total average daily membership (column 5) of 320 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

	1984-85 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)	
	1. Pre-Kindergarten Handicapped	2. Kindergarten	3. Elementary (Grades 1-6)	4. Secondary (Grades 7-12)	5. Total (Pre-K thru Grade 12)	6. Percent Minority	7. Percent Attendance	8. Lowest Value - For any specific variable, the lowest value of that variable among all 437 school districts. The table also shows the highest value for each variable.

XXth percentile - For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 19; this means that approximately 10 percent of the school districts have fewer than 19 staff members. The 25th and 75th percentile are also called quartiles; the 10th, 20th, 30th, ...through 90th percentiles are also called deciles.

Median - For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above.

State Total - For variables 1-5 (1984-85 resident average daily membership), 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding value for all 437 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example, State total pupil-staff ratio =

$$\frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.

STATISTICAL TABLES	
Data for School Districts	18
Data for Counties, Development Regions, and the State	40
Data for ECSU Regions	44
Data for Enrollment Size Groups	46
Summary Statistics	48

This is the fourteenth consecutive year the Minnesota Department of Education is publishing a report which compares each Minnesota school district on nearly forty data items. The item definitions have changed little over-the-years and include data on enrollments, staffing, tax rates, and expenditures. This year-to-year similarity in definitions makes inter-year comparisons possible. As always, a number of the more interesting items are analyzed in a narrative section of the report.

Evaluation of Contents

In terms of content, this edition of Profiles is very similar to that of other recent editions. The first nine pages describe the report and provide a commentary and analysis of some of the more interesting trends. Definitions of the 38 statistical items are contained on pages 10 through 14. Pages 15 through 17 contain an alphabetical list of all school districts, their identification number, and development region. Also included is a state map showing development regions and their constituent counties.

The statistical pages begin on page 18. Pages 18 through 39 contain statistics for individual school districts, pages 40 through 45 for counties and development regions, pages 44 and 45 for ECSU regions, and pages 46 and 47 for districts aggregated into size categories. Pages 48 and 49 contain percentiles and high and low values for each of the 38 statistics.

Notes on Financial Data

The expenditure and revenue data reported in Profiles is derived from UFARS (Uniform Financial Accounting and Reporting Standards), a system utilized by all Minnesota school districts. These data are directly comparable to that reported in the previous four editions of Profiles and are described briefly in Table 1.

Interdistrict Cooperation

In 1979 and again in 1983 the Minnesota legislature enacted laws to encourage districts to cooperate in offering services to their students. This was a departure from the policy of prior years in which every district was required to offer coursework in all grades and was a recognition of how difficult it was for small enrollment districts to offer a wide variety of course options. Under the new legislation two districts might, for example, decide to "split grades"—one providing all courses for certain grades and the other district all courses for the remaining grades.

Districts participating in one of these agreements are noted in the report tables by either an ICA (Interdistrict Cooperative Agreement) or ASE (Agreement for Secondary Education) in parenthesis after the district name. In 1985-86 these districts were:

#57 Beardsley
#801 Browns Valley

#209 Kensington
#265 Hoffman

#328 Sioux Valley
#516 Round Lake

#341 Atwater
#464 Grove City

#409 Tyler
#418 Russell

#413 Marshall
#415 Lynd

#424 Lester Prairie
#427 Winsted
#880 Howard Lake

#524 Halsted
#525 Hendrum

#593 Crookston
#604 Mentor

#597 Erskine
#603 McIntosh

#636 Morgan
#650 Franklin

#637 Redwood Falls
#652 Morton

#654 Renville
#655 Sacred Heart

#669 Magnolia
#670 Luverne

#893 Echo
#896 Wood Lake

Caution should be exercised when comparing data, especially financial data, of the cooperating districts with that from districts not involved in such agreements; interdistrict financial transfers, in the UFARS system, do not effectively relate costs to pupils served in many of these situations.

This is the second consecutive year in which the main statistical tables contain data on Minnesota's two elementary-only districts (Nett Lake #707 and Winsted #427), the two districts who send all of their students to other districts (Franconia #323 and Prinsburg #815) and the experimental district of Pine Point #025.

For More Information

Additional copies of School District Profiles, 1985-86 may be purchased from the Minnesota Documents Division at 117 University Avenue, St. Paul, Minnesota 55155 (telephone 612/297-3000); or toll free in outstate Minnesota 1-800-652-9747.

TABLE 1

Sources of Expenditure Data for School District Profiles

This table is intended primarily for persons who are familiar with UFARS, and who wish to examine or verify the expenditure data for a specific school district.

Each of the 16 expenditure categories in Profiles includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below.

The lower section of the table summarizes the funds, major program categories, and object categories used for profiles.

For a further explanation of UFARS, and for definitions of specific funds, programs, and objects, see: Minnesota Department of Education, Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools.

Categories Used in the Report	Funds[1]	Programs[2]	Objects[3]
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199	
20. Regular instruction	1 and 9	200-299	
21. Vocational instruction	1 and 9	300-399	
22. Exceptional instruction	1 and 9	400-499	All objects
23. Instructional support services	1 and 9	600-699	except 500-599
24. Pupil support services	1 and 9	700-799	and 910
25. Operations and maintenance	1 and 9	800-899	
26. Food service	2	All	
27. Pupil transportation	3	All	
28. Other operating programs	1 and 9	0, 500-599, and 900-999	
29. Total PK-12 operating expenditures (this is the total of categories 18 through 28)	1,2,3, & 9	All	
30. Community service	4	All	
31. Capital outlay	5	All	All but 910 and 460[4]
	1,2,3, & 4	All	500-599
32. Building construction	6	All	All but 910
33. Debt service	7	All	All but 910

[1]Funds

1. General
2. Food Service
3. Pupil Transportation
4. Community Service
5. Capital Expenditure
6. Building Construction
7. Debt Service
9. Trust and Agency

[2]Major Program Categories

0	Districtwide (no specific program)
1-99	District and school administration
100-199	District support services
200-299	Regular instruction
300-399	Vocational instruction
400-499	Exceptional instruction
500-599	Community Services
600-699	Instructional support services
700-799	Pupil support services
800-899	Sites, buildings, and equipment
900-999	Other programs

[3]Objects

460	Textbooks
500-599	Capital expenditures
910	Transfers to other funds

[4] 460, textbook expenditures have been allocated, based on program code, into categories 18-28 to assure valid inter-year comparisons.

TRENDS & PATTERNS

This section examines a number of the more interesting facts contained in the statistical tables beginning on page 18. These include variations between districts as well as year-to-year changes in total state values.

Number of Students

The enrollment decline of the 1970s and 1980s came to an abrupt halt in the 1985-86 school year; total ADM increased 3410 or 4.9 percent. This turnabout was a year earlier than projected. The best available information indicates that it was the result of the movement of students from nonpublic schools into the public school system. Little, if any, of the increase appears to be the result of net migration into Minnesota.

The tremendous geographic diversity in the state is reflected in the wide disparity in the ADM of its school districts. Verdi had only 82 ADM in 1985-86 whereas Minneapolis' ADM was 470 times as large (38,517). Table 2 illustrates this substantial diversity in Minnesota school district enrollment size; the largest ten percent of the districts enroll 54 percent of all public school pupils whereas the smallest ten percent enroll barely one percent.

Professional Staff

Table 3 shows the change in professional staff and pupil-staff ratios for the past decade. As would be expected, total staff relates directly to the number of pupils. This can be observed by the general decrease in total professional staff over the period. However, an examination of the pupil-staff ratio indicates that the relationship is not precisely linear. There has been a trend of decreasing pupil staff ratios. The impetus for this has largely been the result of legal requirements for additional services to handicapped children. In addition, the proportion of pupils in the elementary (K-6) grades has increased. Services to both of these groups is quite labor-intensive. Although the budget crisis of the early 1980s sidetracked the pupil-staff decrease temporarily, the 1985-86 ratio compares favorably with any during the past decade.

Table 2

1985-86 Resident Average Daily Membership (ADM) for Ten Enrollment Size Groups

Group Number	Size Range (1985-86 Resident ADM)	Number of Districts	Total Resident ADM	Percent of State Total
1.	0 to 214 students	44	7,034	1.0%
2.	215 to 289 students	42	10,471	1.5
3.	290 to 374 students	43	14,319	2.0
4.	375 to 464 students	45	19,114	2.7
5.	465 to 619 students	43	23,403	3.3
6.	620 to 819 students	43	30,752	4.4
7.	820 to 1129 students	44	41,996	6.0

9.	1720 to 3699 students	45	113,028	16.2
10.	3700 or more students	43	378,651	54.2
	State Totals	**436**	**699,233**	**100.0%**

Table 3

State Totals of Professional Staff and Pupil-Staff Ratios 1976-77 through 1985-86

School Year	Total Professional Staff	Pupil-Staff Ratio
1976-77	50,898	16.9
1977-78	49,995	16.7
1978-79	49,723	16.2
1979-80	49,391	15.7
1980-81	49,444	15.2
1981-82	48,236	15.1
1982-83	44,553	16.0
1983-84	44,044	15.9
1984-85*	44,744	15.5
1985-86*	45,789	15.2

* includes data for five small districts not included in prior year totals

Tax Rates

School tax rates continue to rise as shown in Figure 1. They are now higher than at any time since 1975 and are 65 percent greater than in 1981. The rapid increases of the past five years are the result of two factors, 1) changes in state funding formulas which allow districts additional latitude in raising levies, and 2) increasing numbers of districts whose taxpayers approved tax referendums.

Sources of Revenue

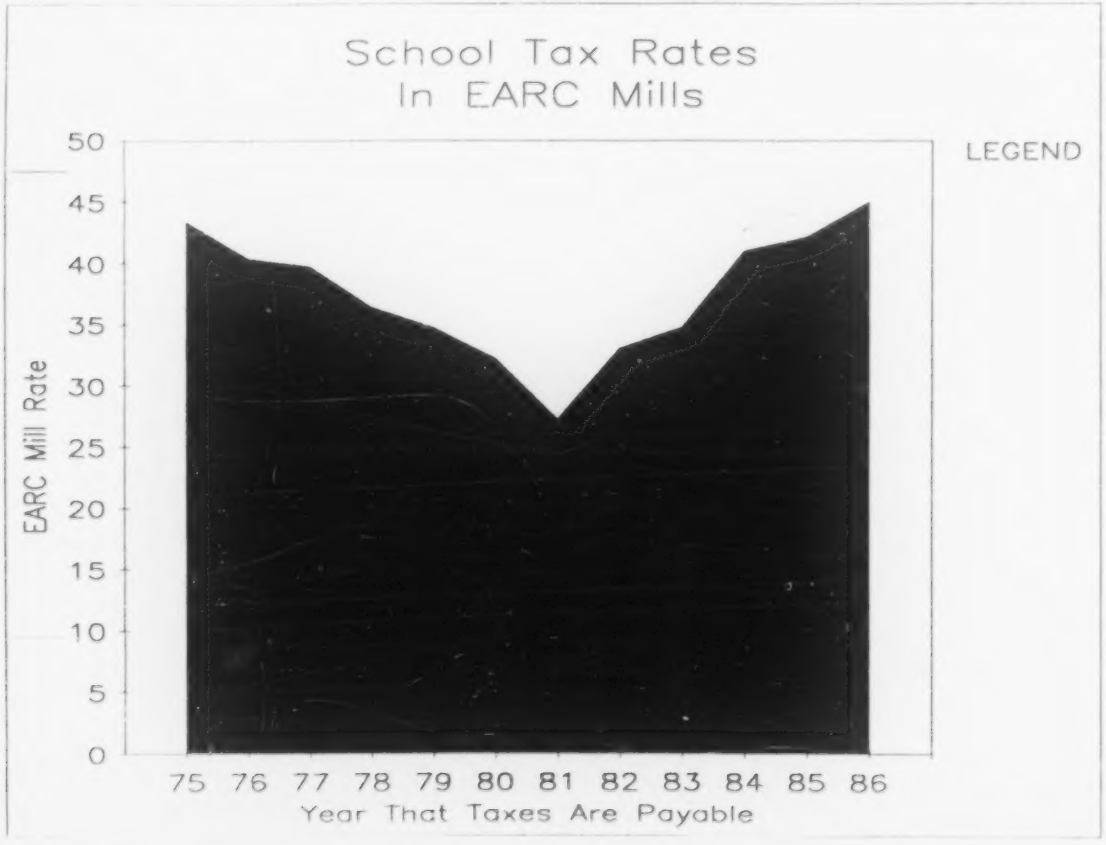
The proportion of school district revenue received from Federal, state, and local sources remained unchanged in 1985-86. Figure 2, shows these relationships for a number of selected years since 1975-76. The pattern is fairly uniform with Federal revenues approximately 5 percent, state 50-55 percent, and local 40-45 percent. A state budget crisis explains the very atypical 55/40 local-state split in 1983. It should be emphasized that these percentages are statewide averages; the proportion of revenues vary dramatically from district-to-district and largely reflect the disparite real property wealth of the districts.

Operating Expenditures

Total PK-12 operating expenditures continued the significant over-the-year increases of recent years. They were $232 or 8.2 percent above the level of 1984-85. In the five years since 1980-81, operating expenditures have grown approximately 9.0 percent a year - this in spite of a 5.6 percent drop in total pupil units during the period. Table 4 breaks total operating expenditures into its constituent parts for the 1984-85 and 1985-86 school year. Instruction accounts

for better than 60 percent of the total. Over-the-year changes were modest. However, when considering a somewhat longer time period, significant changes have occurred. Most significant has been the growth in exceptional instruction which accounted for only 9.0 percent of the total in 1980-81 versus 11.2 percent in 1985-86. This change again reflects the increased level of services to handicapped children referred to earlier in the discussion on professional staff.

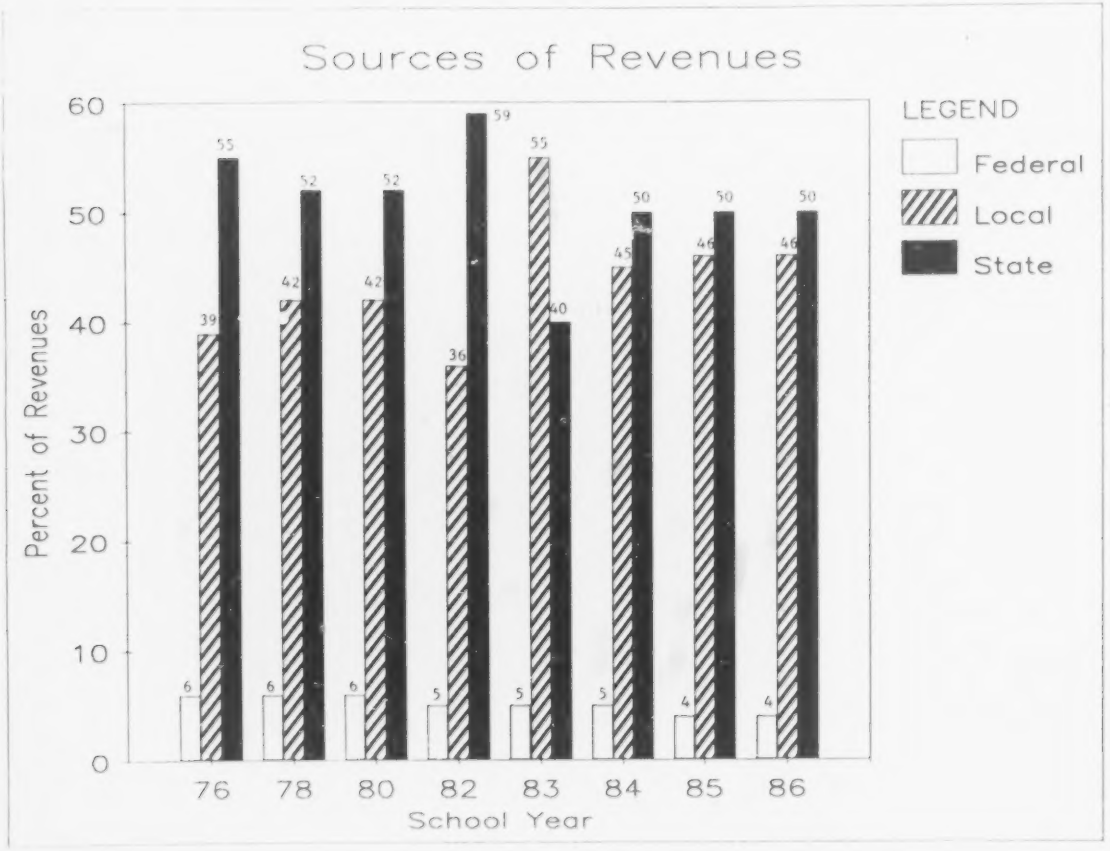
Figure 1



Non-operating Expenditures

Capital Outlay, Building Construction, and Debt Service (columns 31 through 33, respectively) could be considered non-operating expenditures. They are somewhat analogous to what economists refer to as fixed costs - costs which do not readily vary as output varies (in this case, enrollment). As shown in Figure 3, these expenditures grew little in the late 1970s and early 1980s. They have not kept pace with inflation. This type of pattern is so common as to have led some national observers to predict the need for very expensive crash building programs in many areas of the country. The 12.7 percent rise in Minnesota expenditures between 1985 and 1986 is, therefore, probably a favorable development. The reforms in educational finance may not have adequately addressed the very real problem of the varying ability of districts to finance capital replacement/improvements.

Figure 2



Community Service

A somewhat well kept secret of Minnesota PK-12 public education is the area of Community Service. Approximately three-quarters of all districts provide courses ranging from remedial education to recreational activities. The state provides additional aid to districts who levy property taxes for these activities. In addition, beginning in the 1985-86 school year, a new program, Early Childhood Family Education, was legislated. This program provides parenting type services to preschool children and their parents. Approximately 300 districts levied the required mill rate and spent a total of $12.7 million on this new program which explains the substantial increase in Community Service expenditures shown in Table 5.

Table 4

State Averages of PK-12 Operating Expenditures per Pupil Unit, 1984-85 and 1985-86

Category	1984-85 Expenditures	1984-85 % of Total	1985-86 Expenditures	1985-86 % of Total
18. District and school administration	$ 172	6.1	$ 181	6.0
19. District support services	70	2.5	80	2.6
Subtotal, Administration	$ 242	8.6	$ 261	8.6
20. Regular instruction	$1254	44.7	$1357	44.6
21. Vocational instruction	67	2.4	72	2.4
22. Exceptional instruction	306	10.9	341	11.2
23. Instructional support services	97	3.4	111	3.7
Subtotal, Instruction	$1724	61.4	$1881	61.9
24. Pupil support services	$ 71	2.5	$ 78	2.6
26. Food service	139	5.0	144	4.7
27. Pupil transportation	194	6.9	208	6.8
Subtotal, Other student services	$ 404	14.4	$ 430	14.1
25. Operations and maintenance	$ 284	10.1	$ 296	9.7
28. Other operating programs	$ 154	5.5	$ 172	5.7
Total PK-12 operating expenditures	**$2808**	**100.0**	**$3040**	**100.0**

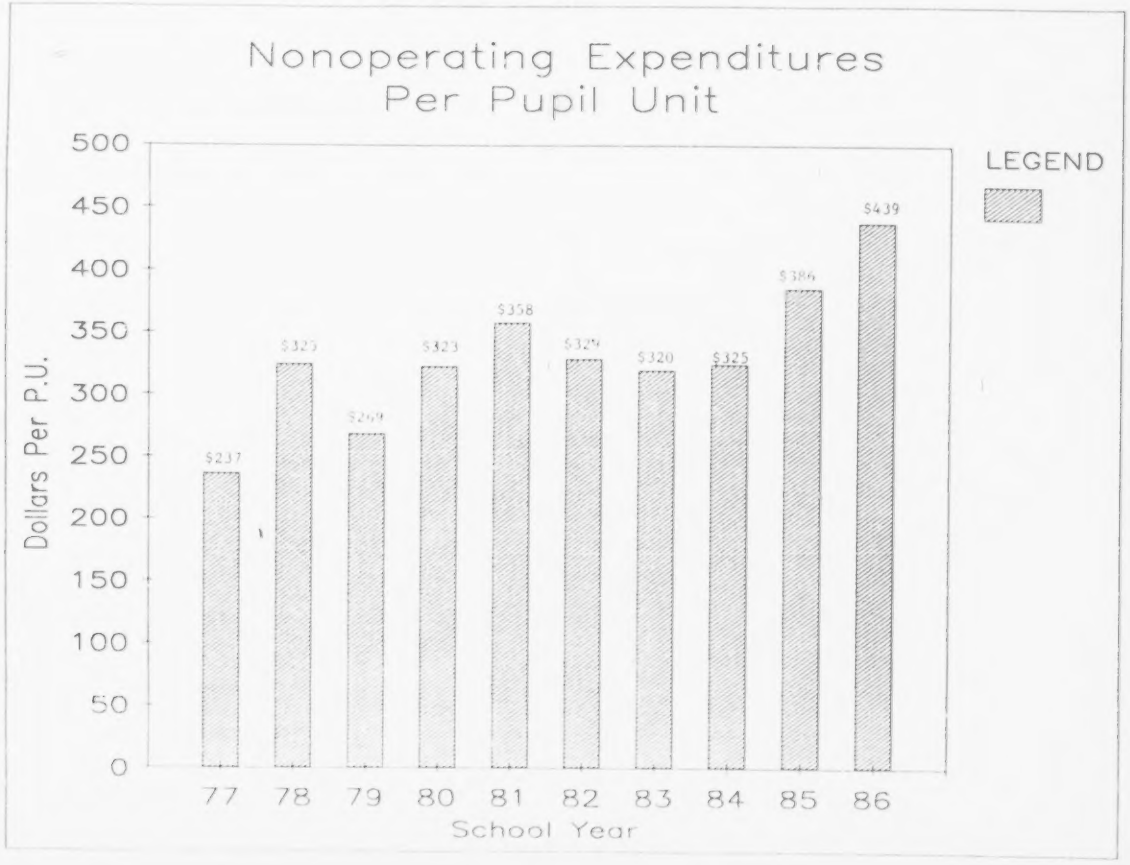
Table 5

Community Service Expenditures Per Pupil Unit	
1976-77	$31.00
1977-78	29.00
1978-79	35.00
1979-80	40.00
1980-81	40.00
1981-82	46.00
1982-83	51.00
1983-84	58.00
1984-85	67.00
1985-86	81.00

Property Valuation

In the discussion of sources of revenue, we stated that the proportion of revenues received by a district from any of the three sources (Federal, state, and local) was largely dependent on its property wealth. Column 38 shows this variation in valuation (EARC valuation/ pupil unit) most dramatically. The Red Lake district's valuation is only $157 per pupil unit and it receives 99 percent of its revenues from state and Federal sources. By contrast, districts such as Humboldt and Becker, with per pupil unit valuations exceeding $100,000. receive most of their revenues locally (70 and 91 percent, respectively).

Figure 3



DEFINITIONS

The tables on pages 18 through 45 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1985-86 school year.[1]

1985-86 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be in attendance to be counted in ADM, but they must be in membership (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of total resident ADM. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy levies. Resident membership includes:

1. **Prekindergarten Handicapped** -- ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten** -- ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1-6** -- ADM of students enrolled in grades 1-6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7-12** -- ADM of students enrolled in grades 7-12, including students in secondary-level ungraded and special education classes.
5. **Total** -- Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority** -- The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic ancestry.
7. **Percent Attendance** -- The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported** -- The number of resident public school students transported to and from school twenty or more days, as a percentage of the district's resident pupils.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary personnel are excluded.

9. **Total Staff FTE** -- The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio** -- The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Rates

These figures show the tax rates, expressed in mills, for school district property taxes payable in 1986. Taxes payable in 1986 provide revenue for the 1986-87 school year.

11. **Auditor Mills** -- The actual school district tax rate, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value.

Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may not be meaningful.

12. **EARC Mills**[3] -- This tax rate is computed by multiplying the district's auditor tax rate times the 1985 market sales ratio. The market sales ratio is the ratio of the market value as determined by local assessors, to the actual selling price of the property. Market sales ratios are compiled by the Minnesota Department of Revenue EARC Sales Ratio Unit.

    EARC tax rates are computed to compensate for differences in assessment practices. Thus, when comparing the level of gross tax burden in various districts, these rates provide a better comparison than auditor tax rates.

Pupil Units (Weighted ADM)

13. **Resident Pupil Units** -- This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.

14. **Total Pupil Units** -- This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district[4], and 2) nonpublic school students who attend the public school part-time for specific classes or services.

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1985-86 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal** -- The percentage of revenues from the federal government, whether paid directly or through another governmental unit.

16. **State** -- The percentage of revenues from the Minnesota State government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.

17. **Local and Other** -- The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources except for federal and state government.

1985-86 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1985-86 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

18. **District and School Administration** -- Expenditures for the school board and for the office of the superintendent, principals, and any other line administrators who supervise staff.

19. **District Support Services** -- Expenditures for central office administration which are not directly related to instruction, pupil support (see #24), or community services (see #30).

Examples include expenditures for business services, data processing, legal services, personnel office, printing, and the school census.

20. **Regular Instruction** -- Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction** -- Expenditures in secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction** -- Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Examples include expenditures for special instruction of students who are emotionally or psychologically handicapped, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.
23. **Instructional Support Services** -- Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audio- visual support, staff development, and computer assisted instruction.
24. **Pupil Support Services** -- Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
25. **Operations and Maintenance** -- Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
26. **Food Service** -- Expenditures for the preparation and serving of meals and snacks to students.
27. **Pupil Transportation** -- Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.
28. **Other Operating Programs**[5] -- Includes all operating expenditures that were not charged to any other category (columns 18-27).
29. **Total PK-12 Operating Expenditures** -- The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1985-86 school year, except capital and debt service expenditures.
30. **Community Service** -- Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
31. **Capital Outlay** -- All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.

32. **Building Construction** -- Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of equipping new buildings, and all other related costs.
33. **Debt Service** -- Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and state loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance** -- This figure is a measure of the district's financial condition at the end of the 1985-86 school year, and of how much resources are available to be used in future years. It is equal to the sum of the unappropriated balances on June 30, 1986, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt, plus the appropriated fund balance for current use of taconite payments; this balance is then divided by 1985-86 resident pupil units (column 13).
35. **Change in Funds Balance** -- The difference between the district's operating funds balance on June 30, 1986 (see #34 above) and on June 30, 1985, divided by 1985-86 resident pupil units. This is essentially equal to the difference between the district's 1985-86 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.
36. **State and Local Operating Costs** -- This figure, also called adjusted maintenance cost, is often used to compare overall costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. It is computed as follows:

    Sum of all expenditures for current operation of the schools
        (doesn't include expenditures for transportation, community services, capital outlay - excluding textbooks, building construction, or debt service),
    Minus all revenue from the federal government,
    Minus revenue from sale of food and materials,
    Minus admission fees and gate receipts from school activities; This total is then divided by 1985-86 total pupil units (column 14).

37. **Long Term Debt** -- The amount of long term debt outstanding on June 30, 1986, divided by 1985-86 resident pupil units. Long term debt includes bonds and capital and debt service and energy loans from the state.
38. **1985 EARC Value** -- The 1985 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1985-86 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

Footnotes

1. There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1986; these taxes will provide revenue for the 1986-87 school year. The EARC value (column 38) is based on property values in 1985; this figure will be used in computing state aids and tax levy limitations for the 1987-88 school year.
2. For some school districts and some categories of students, the counts of students transported were estimated.
3. For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district.

4. In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1985-86 there were 10,200 students (6,900 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be inaccurate in the other district.
5. Some school districts included all expenditures for employee benefits in the same UFARS programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order.

boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 17), with the following exceptions: ECSU region 1 contains development regions 1 and 2, ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.

DATA FOR ENROLLMENT SIZE GROUPS

The table below list totals or averages for all districts in each of ten enrollment size groups, based on 1985-86 resident average daily membership (ADM). For example, group 1 includes all districts with 214 or fewer ADM, and group 2 includes all districts with 215 to 289 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

County Number and Name School District Name		1985-86 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)

The chief purpose of this table is to permit easy comparisons of districts with similar enrollment. For example, a superintendent in a district with 600 pupils may want to examine the data for group 5 (465 to 619 ADM), to see how his/her expenditures compare with other districts that are of similar size.

SUMMARY STATISTICS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 82.0 to a high of 97.9. Ninety percent of the school districts are within the narrow range of 94.0 (5th percentile) to 96.7 (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate this use of the data.

1. A district which has total K-12 operating expenditures (column 29) of $2,900 per pupil unit is very near the median value, which is $2,951. Thus, about half the districts in the state have lower and half have higher expenditures.

2. A district with total average daily membership (column 5) of 320 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

Lowest Value - For any specific variable, the lowest value of that variable among all 436 school districts. The table also shows the highest value for each variable.

XXth percentile - For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 20; this means that 10 percent of the school districts have 20 or fewer staff members (FTE). The 25th and 75th percentile are also called quartiles; the 10th, 20th, 30th, ...through 90th percentiles are also called deciles.

Median - For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above.

State Total - For variables 1-5 (1985-86 resident average daily membership), 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding value for all 436 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example, State total pupil-staff ratio =

$$\frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.
